

SEQUOIA

Comfortable and ventilated arborist saddle for traditional climbing technique

new products 2008

- Twin-webbing construction technology
- Suspension bridges available in 25, 30 & 35
- Angled side D-rings for easy access
- 7 CARITOOL slots
- Height-adjustment strap for gated rings
- Rings that open for quick bridge alterations
- FAST quick connect buckles at waist and legs
- Wide leg straps contact surface area

The SEQUOIA saddle is designed to be used for traditional climbing techniques.

Features:

- The wide waist belt and leg straps of the new SEQUOIA arborist saddles are designed to provide comfort, support and ventilation for long days of extended periods of hanging in trees. The twin webbing construction of the waist belt includes stiffeners, perforated padding and mesh fabric that offers a impressive balance between excellent support and breathability. It's narrowing side design reduces rib constraint. The waist belt contoured lateral attachment points are positioned for easy access.
- Rugged yet lightweight materials and construction provide excellent durability at 1.37 Kg in weight.
- Gated positioning Rings can be opened to allow for easy replacement of suspension bridges, insertions of swivels and triangulation adjustment of these rings.
- Waist belt comes with a multitude of tool attachment points: 5 gear loops, two side plastic rings to attach hand saws, 7 webbing slots to accept 4 small and 3 large CARITOOL tool holders.
